WORK SUMMARY

Full Stack Developer with hands-on experience in building and deploying scalable applications using Python (FastAPI), Node.js, Express.js, MongoDB, and ReactJS. Strong expertise in backend development, including the design of secure, high-performance RESTful APIs, asynchronous services, and data-driven architectures. Proficient in containerization and orchestration using Docker and Kubernetes, as well as infrastructure automation with Terraform. Experienced in implementing CI/CD pipelines using GitHub Actions and deploying, monitoring, and scaling applications on AWS cloud services.

TECHNICAL SKILLS

Programming Languages :	Javascript , Typescript , Python , Java
Library/Frameworks :	React.js , Next.js , Node.js , Redux , FastAPI, GraphQL
Databases :	MySQL , MongoDB , PostgreSQL , DynamoDB
Tools :	Docker, AWS, CI/CD, Redis, Kubernetes

WORK EXPERIENCE

FullStack Developer Pitchline	June 2025 - Present
---	---------------------

- Designed and developed Python-based backend services using FastAPI to support an AI-powered SDR platform, enabling low-latency RESTful and WebSocket APIs for real-time lead engagement, conversation handling, and AI inference workflows.
- Improved high-throughput performance by integrating Redis caching with PostgreSQL and deploying these services in Docker containers orchestrated via Kubernetes.
- Built and integrated a ReactJS frontend for internal dashboards and SDR workflows, enabling real-time conversation views, lead management, campaign configuration, and AI output monitoring via WebSockets.

Full Stack Developer Stacklab	October 2023 - May 2025
---	-------------------------

- Built scalable web applications from scratch using Next.js and TypeScript, backed by Node.js and Python (FastAPI) APIs, including GraphQL services for efficient data querying.
- CI/CD pipelines for automated testing, building, and deployment, while deploying a serverless architecture on AWS using Lambda, S3, and DynamoDB.
- Developed Python microservices for scalable backend processing and automation.

React Developer Intern Harman International	July 2023 - Sept 2023
---	-----------------------

- Developed and maintained dynamic web applications with a focus on increasing performance.
- Built seamless API integrations with the Node.js backend team, ensuring smooth data flow and robust application performance.

EDUCATION

Deenbandhu ChhotuRam University of Science and Technology, Murthal
Bachelor's of Technology in Electronics and Communication Engineering
